DETAILED ACTION

Election/Restriction

1. Restriction to one of the following inventions is required under 35 U.S.C. 121:
 - I. Claims 1-5, drawn to a method of stimulating growth with a polypeptide ,
classified in class 514, subclass 2.
 - II. Claims 6-8, drawn to a method of stimulating growth with a nucleic acid or
expression stimulating agent, classified in class 514, subclass 44.
 - III. Claims 9-11, drawn to a polypeptide, classified in class 530, subclass 350.
 - IV. Claim 12, drawn to nucleic acid vector, classified in class 536, subclass 23.1.
 - V. Claim 13, drawn to a method of identifying substances, classified in class 436,
subclass 518.
2. The inventions are distinct, each from the other because of the following reasons:
3. Inventions III and IV are related as products. The products are distinct from each other as they are alternatively composed of nucleic acids and amino acids.
4. Inventions I, II and V are related as methods. The methods differ each from the other in reagents, steps, functions and outcomes.
5. Inventions III-IV and I, II, V are related as product and process of use. The inventions can be shown to be distinct if either or both of the following can be shown: (1) the process for using the product as claimed can be practiced with another materially different product or (2) the product as claimed can be used in a materially different process of using that product (MPEP

Art Unit: 1647

§ 806.05(h)). In the instant case the process can alternatively be practiced with Nerve Growth Factor and the product can be used in the different process of preparing an antibody.

6. Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classification, restriction for examination purposes as indicated is proper.

7. Because these inventions are distinct for the reasons given above and the search required for any Group is not required for any other Group, restriction for examination purposes as indicated is proper.

8. Because these inventions are distinct for the reasons given above and have acquired a separate status in the art because of their recognized divergent subject matter, restriction for examination purposes as indicated is proper.

9. Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).

10. Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a petition under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(I).
